I hereby certify that the information submitted is of the animal described on this application. I understand that only normal results will be released to the public unless the initials of a registered owner appear in the authorization box below which permits the OFA to release abnormal results to the public.

Signature of owner or authorized representative _____

Authorization to Release Abnormal Results

I hereby authorize the OFA to release the results of its evaluation of the animal described on this application to the public if the results are abnormal
 _____ (initials of registered owner).

Patellar Examination Results

1. Normal

right left

2. Patellar Luxation

bilateral
 unilateral: right left
 luxated: medial lateral
 luxation is: intermittent permanent
 age of onset: < 2 months 2-6 months
 6-12 months > 12 months

3. Classification of luxation

Grade 1—The patella easily luxates manually at full extension of the stifle joint, but returns to the trochlea when released.
 Grade 2—There is frequent patellar luxation which, in some cases becomes more or less permanent.
 Grade 3—The patella is permanently luxated with torsion of the tibia and deviation of the tibial crest of between 30 degrees and 50 degrees from the cranial/caudal plane.
 Grade 4—The tibia is medially twisted and the tibial crest may show further deviation medially with the result that it lies 50 degrees to 90 degrees from the cranial/caudal plane.

I certify that the examination was performed according to the OFA procedure.
 I DID verify tattoo/microchip on this dog I DID NOT verify tattoo/microchip on this dog
